

**MAG-DRIVEN OR MECH-SEALED** 

PP • E-CTFE

50 Hz-60Hz

# **HORIZONTAL CENTRIFUGAL PUMPS**

# FOR CORROSIVE FLUIDS, CLEAN AND WITH SOLIDS

This series of thermoplastic pumps is available in both magnetic drive setting and mechanical seal for pumping various chemical liquids even if laden with impurities and suspended solids. Mainly by the quantity and quality of these, you can choose the setting that better suits you. A patented system for dry running without damage is available for the magnetic drive "R" version.

Magnetic-driven close-coupled pumps

**ROUTE ZMR** 

Mechanical sealed close-coupled pumps

# **CONSTRUCTION**

TMR (G2-G3 sizes)	WR	GF	GX*	
Volute casing	GED (DD	055/5 0755	CFF/E-CTFE	
Rear casing	GFR/PP	CFF/E-CTFE		
Centrifugal impeller				
OR gasket	FKM (1)	FKM (1); (2)	FKM (1); (2)	

(1) EPDM and (2) FFKM on request - (\*) Compliant to ATEX 94/9/EC

#### **MATERIALS**

VERSION	REINFORCED POLYMERS	MIN. TEMP.	MAX TEMP.	ENVIRON- MENT TEMP.
WR	GFR/PP	-5°C (23°F)	80°C (176°F)	0÷40°C (14÷104°F)
	CFF/E-CTFE	-20°C (-4°F)	100°C (212°F)	-20÷40°C
GF	CIT/L-CITE	-20 C (-41)	100 C (212 1 )	(-4÷104°F)
GX*	CFF/E-CTFE	-20°C (-4°F)	100°C (212°F)	-20÷40°C
				(-4÷104°F)

GX

Note: Maximum inlet pressure: 1,5 bar - (\*) Compliant to ATEX 94/9/EC

#### FOR ALL CHEMICALS

The ROUTE pumps are ideal for all chemicals at low and medium temperatures with the bodies made of WR or GF:

#### · Loaded fluids, lightly abrasive

The different internal configurations of the materials allow to pump both clean fluids and with solids in suspension or moderately abrasive.

#### · Heavy fluids

Strong magnetic coupling made of rare-earth materials (Neodimium Iron Boron) and "N" (standard), "P" (powered) or "S" (strongly powered) versions allow to pump liquids with 1.05 - 1.35 - 1.8 specific grativy respectively.

### **ATEX**

**ROUTE** pumps made of PP or E-CTFE + carbon fiber are perfect for operating into **EXplosive ATmospheres**. They can run in Group II areas and category 1, 2, 3 according to the level of protection. Thanks to the carbon fiber, they are ideal for gaseous atmospheres (Zone 1, Zone 2).

# MAIN APPLICATIONS

- Water and wastewater treatments
- Surface treatments
- Chemical and pharmaceutical processes
- · Lithium battery storage
- Semiconductors
- Photovoltaic

View of stainless steel reinforced flat-face flange connections

### **MAGNETIC DRIVE "T"**

The mag-driven system excludes any type of rotating seal. The sealing is guaranteed thanks to an O-ring static gasket placed in the connection between the volute casing and the rear casing. It is possible to couple standard motors without disassembling the pump.

GH	IDII	VG.	SVS"	<b>TEMS</b>

	WR		GF			GX		
TMR (G2-G3 sizes)	R1	X1	N1	R2	X2	N2	R2	N2
Guide bushing	Carbon HD	SiC	GFR/ PTFE	Carbon HD	SiC	GFR/ PTFE	Carbon HD	GFR/ PTFE
Thrust bush		CER			SiC		Si	С
Shaft	CER			SiC			Si	С

R2 - standard conditions P2 - critical conditions X2 - extreme conditions

#### **DRY-RUNNING PATENTED (OPTIONAL)**

The impeller subjected to different hydraulic load is free to move axially. Two rings which are limit devices of its excursion fix the work-space it egages during the standard operation. In case of anomalies due to pressure loss while dry-running, the extra magnetic field calls back the impeller to the neutral position.

- Magnetic-driven assembly
- 2 Centrifugal impeller (magnetic part)
  - Centrifugal impeller (covered type)

# **MECHANICAL TRANSMISSION "Z"**

In the sealed version, the impeller is mounted on the motor shaft and the liquid leakage on the motor is prevented by mechanical seals with the appropriate material. To compare with the magnetic driven version, the mechanical seal allows the pumping of uncleaned liquids, liquids ladened with solids.

#### MECHANICAL SEALS

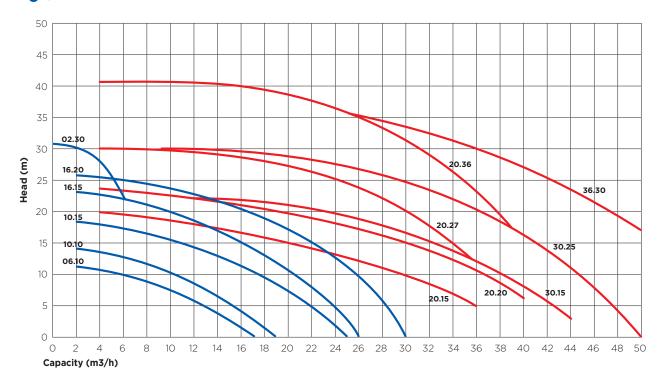

CONSTRUCTION	MODEL	ROTATING PART	FIXED RING	BELLOW	WORKING CONDITIONS	
	BS5	CARBON	CER		LOW COST	
	BS7	CARBON	SiC		(easy maintenance)	
INTERNAL SINGLE	BS6	SiC	CER	FKM	LOW COST HARD PARTICLES (easy maintenance)	
	BS8-BF3**		SiC		HARD PARTICLES	
EXTERNAL SINGLE	SF1	GFR/PTFE	CER	PTFE

# **VARIOUS CONFIGURATIONS**

Flanged version with armour

Std flanged version

Std threaded version

Threaded version with armour

#### **ARMOUR**

A stainless steel armour was designed to fit all models to protect the front casing from accidental mechanical shocks of various nature (e.g.: starts up with vacuum in inlet piping with possible tubing excursions due to elastic brackets or thermal elongation). The guard plate is optional for the G3 size of pumps.

## **BASEPLATE**

The base for anchorage of the pump is in stainless steel with ground terminals in chemical-resistant thermoplastic materials. It is supplied upon request.

"BSP" outlet cylindrical threaded connection

## **VARIOUS CONNECTIONS**

Connections with BSP cylindrical thread or NPT; flanges ISO, ANSI, JIS.

Detail of outlet flanged connection directly to the plant flange

#### **WET-END**

The complete casing (or wet-end)of any mag-driven **ROUTE** pump can be easily detached from the other parts, without opening it. This is a remarkable technical alternative for spare parts.
